

## Florida Arbovirus Surveillance

### Week 3: January 17-23, 2016

Arbovirus surveillance in Florida includes endemic mosquito-borne viruses such as West Nile virus (WNV), Eastern equine encephalitis virus (EEEV), and St. Louis encephalitis virus (SLEV), as well as exotic viruses such as dengue virus (DENV), chikungunya virus (CHIKV) and California encephalitis group viruses (CEV). Malaria, a non-viral mosquito-borne disease is also included. During the period of January 17-23, 2016 the following arboviral activity was recorded in Florida.

[This report contains information for 2015 and 2016.](#)

**WNV activity:** No human cases of WNV infection were reported this week. No horses with WNV infection were reported this week. Six sentinel chickens tested positive for antibodies to WNV this week in Manatee, Orange, Sarasota, and Walton Counties. In 2016, positive samples from four sentinel chickens have been received from three counties. In 2015, positive samples from 11 humans, two blood donors, six horses, 11 mosquito pools, and 446 sentinel chickens have been received from 28 counties.

**SLEV activity:** No human cases of SLEV infection were reported this week. No sentinel chickens tested positive for antibodies to SLEV this week. In 2016, there have been no positive samples reported. In 2015, positive samples from nine sentinel chickens have been received from seven counties.

**EEEV activity:** No human cases of EEEV infection were reported this week. No horses with EEEV infection were reported this week. Three sentinel chickens tested positive for antibodies to EEEV this week in Citrus, Orange, and Walton Counties. In 2016, positive samples from four sentinel chickens have been received from two counties. In 2015, positive samples from 82 sentinel chickens, 23 horses, and one goat have been received from 26 counties.

**International Travel-Associated Dengue Fever Cases:** Two cases of dengue fever were reported this week in persons that had international travel. In 2015, 86 travel-associated cases have been reported.

**Dengue Fever Cases Acquired in Florida:** No cases of locally acquired dengue fever were reported this week. In 2015, one case of locally acquired dengue fever has been reported.

**International Travel-Associated Chikungunya Fever Cases:** One case of chikungunya fever was reported this week in a person that had international travel. In 2015, 75 travel-associated cases have been reported.

**Chikungunya Fever Cases Acquired in Florida:** No cases of locally acquired chikungunya fever were reported this week. In 2015, no cases of locally acquired chikungunya fever have been reported.

**International Travel-Associated Zika Fever Cases:** No cases of Zika fever were reported this week in persons that had international travel. In 2016, three travel-associated cases have been reported. No cases of locally acquired Zika fever have been reported.

**Advisories/Alerts:** No counties are currently under mosquito-borne illness advisory or alert. There is a Level 2 (Alert) Travel Health Notice from the CDC for multiple countries in the Caribbean, Central and South America, Mexico, Cape Verde, and Samoa related to Zika virus transmission and a possible association with poor pregnancy outcomes. Pregnant women should consider postponing travel to these areas. There is a Level 1 (Watch) Travel Health Notice from the CDC for multiple countries in the Caribbean, Central and South America, and Mexico, related to the transmission of chikungunya virus. While a travel health notice has not been issued for the recent locally acquired dengue fever cases in Hawaii, visitors should continue to take appropriate mosquito bite precautions while traveling. Additional information on travel health notices can be found at the following link: <http://wwwnc.cdc.gov/travel/notices>.

## 2015 Human Case Summary\*

**West Nile Virus Illnesses Acquired in Florida:** A total of eleven human cases of WNV illness acquired in Florida have been reported in 2015; one in Duval County (November), four in Escambia County (July, August, and September), one in Hillsborough County (September), one in Marion County (October), one in Pinellas County (July), one in Volusia County (July), and two in Walton County (June). Two asymptomatic positive blood donors have been reported in 2015; one in Hillsborough County (September) and one in Manatee County (October).

**International Travel-Associated Chikungunya Fever Cases:** Seventy-five cases of chikungunya with onset in 2015 have been reported in individuals with travel history to a chikungunya endemic country or area experiencing an outbreak in the two weeks prior to onset. Countries of origin were: Bolivia, Colombia (13), Dominican Republic, Ecuador, El Salvador (3), Guatemala (4), Haiti (2), Honduras (6), India (2), Jamaica (3), Mexico (12), Nicaragua (20), Puerto Rico (4), Trinidad and Tobago, Venezuela, and Virgin Islands. Counties reporting cases were: Brevard (2), Broward (10), Collier (2), Columbia, Duval (2), Escambia, Hardee, Hillsborough (3), Lake, Lee (2), Levy, Manatee, Martin, Miami-Dade (27), Monroe, Orange (3), Osceola, Palm Beach (6), Pinellas, Polk, Sarasota, Seminole (3), and Volusia (3). One case was reported in a non-Florida resident.

**International Travel-Associated Dengue Fever Cases:** Eighty-six cases of dengue with onset in 2015 have been reported in individuals with travel history to a dengue endemic country in the two weeks prior to onset. Countries of origin were: Bangladesh, Brazil (5), Colombia, Costa Rica (3), Cuba (29), Dominican Republic (6), El Salvador, Guatemala, Haiti (11), Hawaii (3), Honduras, India (3), Jamaica, Mexico (3), Nicaragua (2), Philippines (4), Puerto Rico, Thailand, Venezuela (8), and Vietnam. Counties reporting cases were: Alachua, Broward (8), Clay (2), Collier, Duval, Flagler, Hernando, Hillsborough (7), Lee (2), Miami-Dade (41), Monroe (2), Orange (2), Osceola, Palm Beach (7), Pinellas (3), St. Johns, St. Lucie (3), and Seminole (2). Seven cases were reported in non-Florida residents. In 2015, 42 of the 86 cases of dengue reported in Florida have been serotyped by PCR. Additional serotyping and strain typing are being conducted.

**Dengue Fever Cases Acquired in Florida:** In 2015, one case of locally acquired dengue fever has been reported in Broward County, with onset in October.

**International Travel-Associated Zika Fever Cases:** Three cases of Zika fever have been reported in individuals with travel history in December to a country or area experiencing Zika virus activity. Countries of origin were: Colombia and Venezuela. Counties reporting cases were: Hillsborough and Miami-Dade.

**International Travel-Associated Malaria Cases:** Fifty-five cases of malaria with onset in 2015 have been reported. Countries of origin were: Afghanistan, Angola, Brazil, Cameroon (5), Central African Republic, Central/South America (2), Democratic Republic of the Congo/Uganda, Dominican Republic (2), Eritrea, Gabon, Ghana (7), Guatemala (2), Haiti (5), India (4), Kenya, Malawi, Niger, Nigeria (9), Papua New Guinea, South Sudan, Sudan (4), Tanzania (2), and Uganda. Counties reporting cases were: Alachua, Broward (10), Charlotte, Collier, Duval (3), Escambia, Flagler, Hillsborough (2), Lake, Lee (2), Manatee (2), Monroe, Miami-Dade (13), Okaloosa, Orange (5), Osceola (2), Pinellas (2), Palm Beach (3), Sarasota, and Volusia. Thirteen of the cases were reported in non-Florida residents.

Forty-one cases (75%) were diagnosed with *Plasmodium falciparum*. Twelve cases were diagnosed with *Plasmodium vivax* (22%). One case (2%) was diagnosed with *Plasmodium malariae*. One case was diagnosed with *Plasmodium ovale* (2%).

### Veterinary Cases\*

\*Veterinary cases are reported by date of onset

No horses with EEEV or WNV infection were reported this week.

## Sentinel Chickens\*

The table below is for the reporting of confirmatory laboratory results from this week. Some of the samples were collected at earlier dates. The date of collection is recorded for samples collected on that day along with the total number of positives and the corresponding seroconversion rate for the week the sample was collected.

Six sentinel chickens tested positive for antibodies to WNV this week in Manatee, Orange, Sarasota, and Walton Counties. Three sentinel chickens tested positive for antibodies to EEEV this week in Citrus, Orange, and Walton Counties.

County	Collection Date	Seroconversion Rates (%)						County Totals	
		Flavi	SLEV	WNV	Alpha	EEEV	HJV	Collection Week	YTD
Citrus	01/04/16				1.56	1.56		1 EEEV	1 EEEV
Manatee	12/28/15	3.08		3.08				2 WNV	39 WNV, 1 EEEV
Orange	12/17/15				0.85	0.85		1 EEEV	16 EEEV, 2 HJV, 28 WNV

### Dead Birds

The Fish and Wildlife Conservation Commission (FWC) collects reports of dead birds, which can be an indication of arbovirus circulation in an area. This week, 5 reports representing a total of 8 dead birds, including 1 raptor were received from 4 counties.

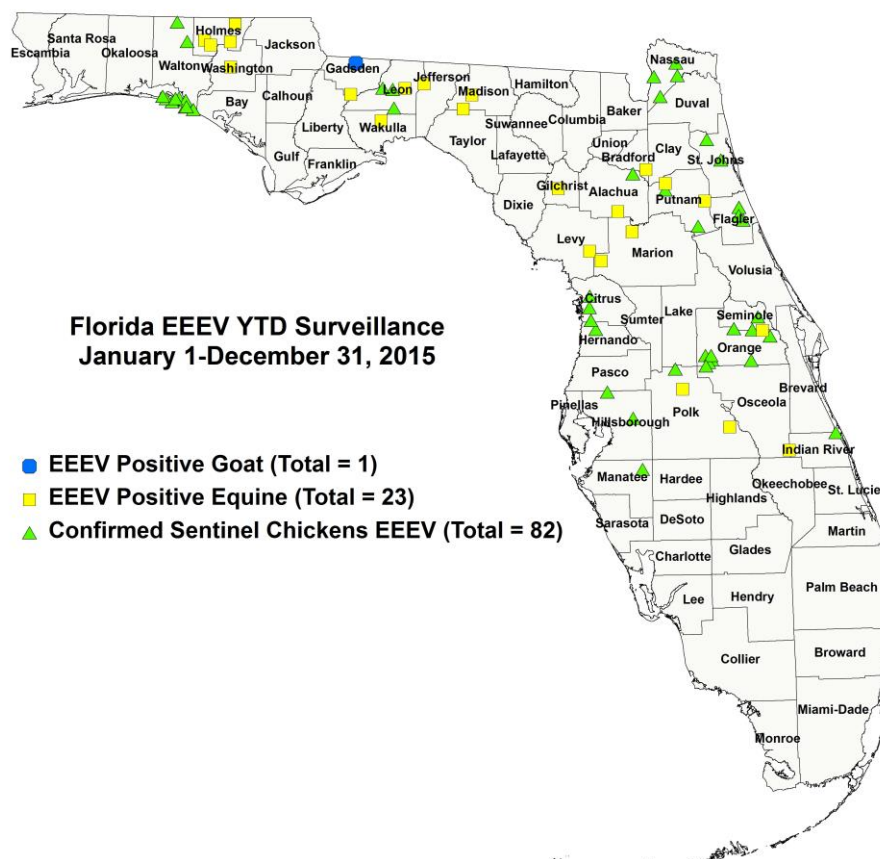

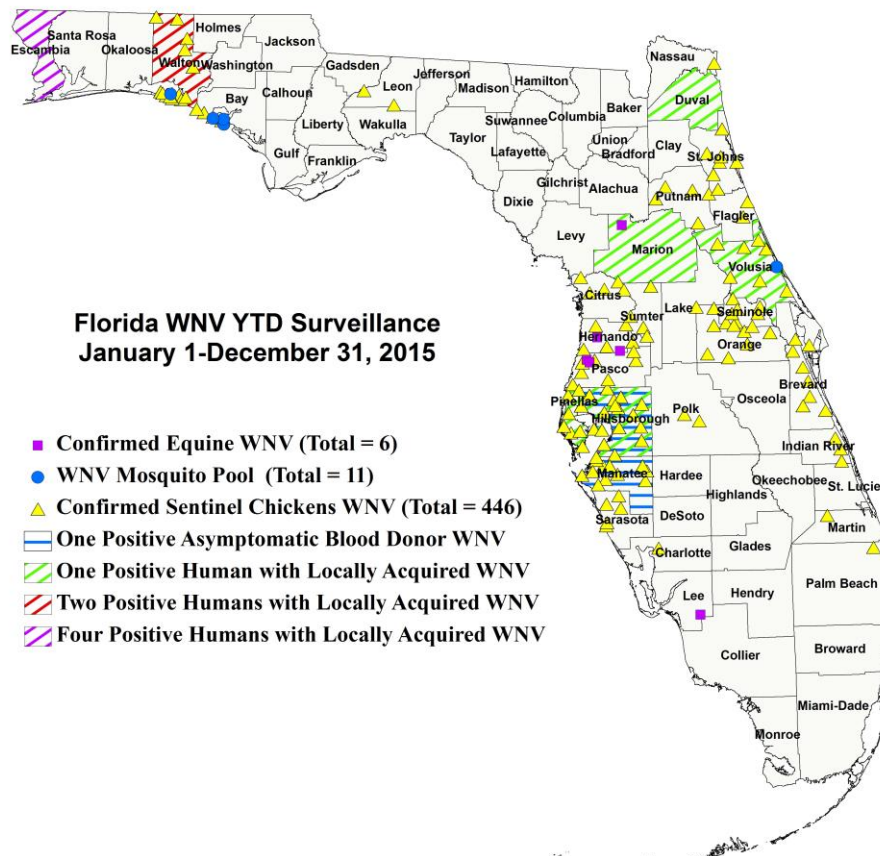

In 2016, 30 reports representing a total of 168 dead birds (30 crows, 0 jay, 6 raptors, and 0 doves) were received from 21 of Florida's 67 counties. Please note that FWC collects reports of birds that have died from a variety of causes, not only arboviruses. Dead birds should be reported to [www.myfwc.com/bird/](http://www.myfwc.com/bird/).

\*\*Case tallies included in the weekly Florida arbovirus surveillance report include confirmed and probable cases for EEE, WNV infection, SLE, dengue, chikungunya, and malaria by date of onset. Suspect cases are not included. Activity is mapped by county of exposure rather than county of residence. Case definitions being used in Florida are consistent with national criteria provided by the Council of State and Territorial Epidemiologists (CSTE) and may be viewed at: <http://www.floridahealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/index.html>. Case tallies reported by CDC do not include suspect cases and cases are reported by patient state of residence rather than where the exposure occurred. Data is provided by county health departments, Department of Health Bureau of Public Health Laboratories, Department of Agriculture and Consumer Services, mosquito control agencies, Florida Fish and Wildlife Conservation Commission, medical providers and veterinarians. Equine cases are provided by the Department of Agriculture and Consumer Services.
