### Reported by Week

### Reported by Island

**Reported Case:** Any resident or visitor to the USVI diagnosed by a health care provider with suspected Zika; regardless of subsequent laboratory testing.

**Confirmed Case:** A laboratory positive reported case with Zika virus-specific nucleic acid in serum and/or IgM antibodies in serum and confirmatory plaque reduction neutralization testing to differentiate potential cross-reactive antibodies.

**Lab Negative:** A laboratory negative reported case without Zika virus-specific nucleic acid and/or IgM antibodies in serum.

\*Case counts are subject to change dependent upon receipt of diagnostic results.
